

A mass scavenger hunt, a mental adrenaline rush that puts the challenge of team organisation and co-ordination, strategy making and the struggle of company-wide information flow to the fore.

An ordinary interior with unconventional challenges: A few pictures on the wall, some office drawers, a table and a caged safe.

The goal is clear: open the safe within the limited time you have. The way to get there is different for every team. No matter how big the team is, it will certainly require proper organisation

CAN YOU GET TO THE CLICK OF THE SAFE LOCK?

The first step is to develop a common strategy. Once it is ready it ensures that information is not lost and the team does not get bogged down in unravelling interlocking leads. The initial challenge is provided by the mystery boxes in the room, each containing key tools and instructions to get you closer to unlocking the safe.

The game requires the use of only grey matter and no strength, a little creativity and dexterity. As time ticks down, the logical chase becomes more and more complex.
