THE NOVAKOV- CASE

A stationary logic game based on the search for stolen gold bars.

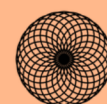

The setting: a foreign bank robber has hidden the stolen gold balls at the venue of the event, which the players (detectives) have to find in teams.

The clues are all over the place. Deceitful employees must be persuaded to cooperate. In addition to logic, attention to every detail plays a key role during the game.

The clock is ticking...
Are you able to prevent the explosion?
